Effects of substrate and inhibition of oxidative metabolism on contraction and myosin phosphorylation in ASM
C.-M. Hai, C. Watson, S. J. Wallach, V. Reyes, E. Kim, and J. Xu

Enhanced Na⁺ transport in an air-liquid interface culture system
L. G. Johnson, K G. Dickman, K I. Moore, I. J. Mandel, and R C. Boucher

Influence of hydroxyl radical on rabbit airway smooth muscle chronically exposed to H₂O₂ in vivo
K. Prasad and J. B. Gupta

Enhanced Na⁺ transport in an air-liquid interface culture system
L. G. Johnson, K G. Dickman, K I. Moore, I. J. Mandel, and R C. Boucher

Influence of hydroxyl radical on rabbit airway smooth muscle chronically exposed to H₂O₂ in vivo
K. Prasad and J. B. Gupta

Regulation of phosphatidylcholine synthesis in fetal type II cells by CTP:phosphocholine cytidylyltransferase
L. J. Zimmermann, M. Hogan, K. S. Carlson, B. T. Smith, and M. Post

N type, ω conotoxin sensitive Ca²⁺ channels mediate electrically evoked release of ACh in guinea pig trachea
D. G. Baker, H. F. Don, and J. K. Brown

EDRF suppresses an unidentified vasoconstrictor mechanism in hypertensive rat lungs

Expression of human Mn SOD in Chinese hamster ovary cells confers protection from oxidant injury
B. Warner, R. Papes, M. Heile, D. Spitz, and J. Wispe

Development of cholinergic innervation and muscarinic receptor subtypes in piglet trachea
B. Haxhiu-Poskurica, P. Ernsberger, M. A. Haxhiu, M. J. Miller, L. Cattarossi, and R J. Martin

BOOKSHELF

Subject Index to Volume 8
Author Index to Volume 8

CORRIGENDA

Volume 263, July 1992
Volume 7, July 1992

Pages L37–L41: Gloria D. Massaro and Donald Massaro. “Formation of alveoli in rats: postnatal effect of prenatal dexamethasone.” Page L39: Tables 4–7 show incorrect sex. The 14-day-old pups were male. The sex of the pups is correct in Tables 1–3.

Volume 263, December 1992
Volume 7, December 1992

Pages L634–L644: Vijayakumar Boggaram and Ramgopal K. Margana. “Rabbit surfactant protein C: cDNA cloning and regulation of alternatively spliced surfactant protein C mRNAs.” Page L634, left-hand column, in the abstract, the sentence beginning on line 22 should read: Southern hybridization analysis of genomic DNA suggested that SP-C mRNAs are encoded by a single gene. Polymerase chain reaction amplification of genomic DNA with oligonucleotide primers flanking the insertional sequence and sequence analysis of amplified DNA showed that SP-C mRNAs are produced by alternative use of 3' splice sites of intron 5 of SP-C gene. Page L634, left-hand column, paragraph 2, line 4 should read: SP-A [relative molecular weight (Mᵦ) ~35,000] and SP-D (Mᵦ ~43,000) are hydrophilic proteins that are similar in having collagenous amino-terminus domain and noncollagenous lectinlike carboxy-terminus domain. SP-B (Mᵦ ~8,000) and SP-C (Mᵦ ~5,000) are hydrophobic proteins derived from larger precursor proteins by amino- and carboxy-terminus proteolytic processing.
