Carbon Monoxide Uptake Monitor for testing lung impairment

Carbon Monoxide uptake can be used in lab animals to assess the impairment of lung functions caused by radiation, environmental pollutants, and toxic or irritable inhalants. It is well known that the carbon monoxide uptake decreases when the lung function decreases. Our new instrument non-invasively measures diffusive function of the lung epithelium, by measuring rate of carbon monoxide uptake and respiration rate (BPM).

Hypoxia Gas Mixer

The Gas Mixer; Pegas 4000, is designed to mix up to 4 separate gases and deliver them as a modified atmosphere. Each component is controlled by individual flow controllers; all calculations are performed internally so the user need only input basic commands. System runs in stand alone operation or by PC connection (software included).

VO2/VCO2 Metabolic System

The VO2/VCO2 metabolic system; Oxymax, measures Oxygen consumption and Carbon Dioxide production rates and calculates Respiration Exchange Ratios in animals. The Oxymax also serves as a platform on to which other sub systems are added. These sub systems are various in function, and can measure other parameters such as Food Intake, Drinking Volume, Animal Activity, Temperature and Heart Rate (via telemetry), and urine collection in up to 32 subjects. These systems are custom built to customer specifications and include software, installation, and on-site training.

Animal Exercisers

The Modular Enclosed Treadmill is specifically designed for measuring VO2/VCO2 during exercise.

Exer 3/6 Open Treadmill for Mice and Rats

The Exer 3/6 is a general purpose exercise treadmill for 3 rats or 6 mice.
Both the Modular Treadmill and the Exer 3/6 feature adjustable speed (6-100 m/M) and adjustable inclination (0-25°). Both have optional electric stimulus with adjustable intensity and repetition rate. Also available is the “Humane Stimulus” option which counts visits to the shocker and turns it off to prevent injury.
To update your online listing in the FASEB Directory of Members, visit www.faseb.org and click on Member Directory on the left or go directly to http://web1.faseb.org/fasebdir.

Click the “Member Update” tab on the top right of the screen to make changes.

Please note: There is a time delay between submitting revisions and their actual appearance online.
Attention Authors:
Important Information about the NIH Public Access Policy & Your Manuscript

Under the NIH Public Access Policy, NIH is asking its funded investigators to voluntarily submit to PubMed Central (PMC) the author's final manuscript of articles resulting from research supported in whole or in part with direct costs from NIH. According to the NIH, this policy applies only to manuscripts accepted for publication on or after May 2, 2005.

If you choose to submit your accepted manuscript to PMC, you will be asked to indicate when that manuscript should be made available to the public. As copyright holder of your article, the APS has the sole right to publish or disseminate it. However, the APS grants you permission to allow public release of your manuscript through PMC 12 months after publication in the print version of an APS journal. This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication. NIH will be able to determine when 12 months have elapsed because APS sends NIH electronic feeds of the article metadata upon publication in a journal issue. Therefore, you can submit your accepted manuscript to PMC at the time of acceptance to an APS journal, and will not have to calculate or track time elapsed from publication.

NIH intends to use the PMC database of manuscripts for portfolio management; to create a permanent archive of articles based upon NIH-funded research; and to give the public access to research publications. In announcing this policy, NIH officials underscored that it is voluntary and there will be no sanctions of any kind against authors who do not submit their manuscripts. If you have any questions with respect to the NIH Public Access Policy and the publication of your article in an APS journal, please contact Margaret Reich at mreich@the-aps.org.

CALL FOR NOMINATIONS
for the Editorship of the
American Journal of Physiology–Endocrinology and Metabolism

Nominations are invited for the Editorship of the American Journal of Physiology–Endocrinology and Metabolism to succeed M. Mueckler, who will complete his term as Editor on December 31, 2006. The Publications Committee plans to interview candidates in the Spring of 2006.

Applications should be received before January 15, 2006.

Nominations, accompanied by a curriculum vitae, should be sent to the Chair of the Publications Committee:

Kim E. Barrett, Ph.D.
Department of Medicine
University of California, San Diego
San Diego, CA 92103-8414

Your monthly (12 issues) subscription will start with the January 2006 issue. Maryland residents add 5% sales tax or provide tax exempt ID number on this coupon. All subscriptions must be paid in advance in U.S. dollars drawn on a U.S. bank located within the United States, or charged to VISA, MasterCard, or American Express.

**IMPACT FACTOR:** 4.051

The *American Journal of Physiology-Lung Cellular and Molecular Physiology* is your comprehensive resource for the most exciting new findings in respiratory physiology.

**AJP-Lung Cellular and Molecular Physiology** covers all areas of respiratory physiology, including:

- Original theoretical and research papers dealing with molecular, cellular, and morphological aspects of normal and abnormal function of cells and components of the respiratory system.
- Specific coverage of gas exchange and metabolic control at a cellular level, regulatory and informational molecules, gene expression, macromolecules, cell-to-cell motility, secretory mechanisms, membrane function, and the response of the respiratory system and its components to the environment.

Authors are required to submit papers online at [www.apscentral.org](http://www.apscentral.org).

---

**Special Features Include:**

- Sign-up for e-mail notification of advance tables of contents.
- Fully searchable text, including PubMed.
- Rich color and sharp resolution of figures.
- Editor’s Home Page: [www.the-aps.org/publications/ajplung](http://www.the-aps.org/publications/ajplung)
- Articles in PresS: Accepted research papers are now published online within a few days after their acceptance.
- Perpetual/Electronic Archiving: The LOCKSS system preserves the electronic content of all APS journals.

**Special APS Member Benefits**

- **FREE Online Access to 15 APS Journals and APS Journal Legacy Content:** Members of the American Physiological Society (APS) receive FREE online access to both the current content and legacy content (going back as far as 100 years for some journals) of these APS research journals (this free online access includes *AJP-Lung Cellular and Molecular Physiology*).
- **FREE Color Figures:** Regular and Emeritus Members of APS who are first or last authors receive FREE color figures in all APS journals.

---

**FREE Online Access to 15 APS Journals and APS Journal Legacy Content:**

- **Members of the American Physiological Society (APS)**
  - **AJP-Lung Cellular and Molecular Physiology**

---

**FREE Color Figures:**

- Regular and Emeritus Members of APS who are first or last authors receive FREE color figures in all APS journals.

---

Dear Librarian,

I would like to recommend that our library subscribe to the American Journal of Physiology–Lung Cellular and Molecular Physiology. This is a journal published online and in print monthly by The American Physiological Society (APS).

The American Journal of Physiology-Lung Cellular and Molecular Physiology contains theoretical and research papers dealing with molecular, cellular, and morphological aspects of normal and abnormal function and response of cells and components of the respiratory system.

How to subscribe: You can subscribe in one of three ways: 1) Online Only, 2) Print & Online, or 3) Print Only. The different subscription rates can be found below. You can also choose to receive free e-mail table of contents notification when new content is released on the web.
