A SELECTION OF SCIENTIFIC & CLINICAL SESSIONS

- Restoration of Alveolo-Capillary Barrier Function
- Epithelial-Mesenchymal Crosstalk: A Matrix for Lung Remodeling
- Lung Innate Immunity*
- The Human Microbiome & Development of Asthma & Allergy
- Bioengineering for Lung Diseases
- Scientific Writing: Publishing for Academic Success*
- Damage-Associated Molecular Patterns in Lung Disease & Critical Illness
- Scientific Breakthroughs of the Year: Progress in Lung Tissue Engineering

*Postgraduate course

"The real benefit of attending the ATS conference is to get away from doing lung research in a vacuum in order to see the relevance of basic science research."
—Zea Borok, MD

"We can’t just rely on scientific journals anymore—they’re up to 12 months behind the times. The Conference presents up-to-the-moment research conducted by one’s peers, in all fields of lung disease."
—Augustine Choi, MD

THE AMERICAN THORACIC SOCIETY’S INTERNATIONAL CONFERENCE IS RECOGNIZED AS THE WORLD’S PREMIER EDUCATIONAL PROGRAM FOR RESEARCHERS AND CLINICIANS IN ADULT AND PEDIATRIC PULMONARY, CRITICAL CARE AND SLEEP MEDICINE.

SET YOUR FOCUS: With 500 sessions, 800 speakers and 5,800 original scientific research abstracts and case reports, ATS 2011 offers attendees a broad spectrum of topics so that they can learn about developments in many fields or concentrate on a specific area of respiratory medicine.

LEARN FROM THE BEST: Leading researchers and clinicians will participate in symposia and present their latest findings at year-in-review sessions, workshops and postgraduate courses.

PRACTICE AT THE FOREFRONT: No other meeting provides as much information about how the science of respiratory, critical care and sleep medicine is changing clinical practice.

NETWORK: The ATS International Conference draws the most knowledgeable scientists and dedicated clinicians from around the world and provides a collegial environment for exchanging ideas.

To learn more about these and other sessions and to register, go to

www.thoracic.org/go/international-conference
Manuscripts to AJP-Lung Cellular and Molecular Physiology are submitted online through www.apscentral.org. Mandatory Submission Forms and Fee Forms customized to your manuscript become available on completion of the submission process. For extra copies of blank forms, see http://www.the-aps.org/publications/journals/index.htm

If you use a blank form, please write the manuscript number, title, and author’s name CLEARLY on the form.
Experimental Biology 2011

April 9 – 13, Walter E. Washington Convention Center, Washington, DC

Submit your abstract today online at www.experimentalbiology.org

Early Registration Deadline: Wednesday, February 9, 2011

Late-Breaking Abstract submission deadline: Wednesday, February 9, 2011

Hotel Reservation Deadline Friday, March 4, 2011

Discover inspiring museums, powerful monuments and memorials in Washington, DC. A diverse, cosmopolitan world capital awaits you. Come for the great science – experience the fascinating, free attractions and festive events that make DC a favorite destination for travelers from around the world.
IN NEXT ISSUE

ACUTE LUNG INJURY
Nasal potential difference to detect Na⁺ channel dysfunction in acute lung injury (Review)
R. Mac Sweeney, H. Fischer, and D. F. McAuley

Inhibition of apoptosis by 60% oxygen: a novel pathway contributing to lung injury in neonatal rats (Translational Physiology)
Man Yi, Azbar Masood, Adrian Ziino, Ben-Hur Johnson, Rosetta Belcastro, Jun Li, Samuel Shek, Crystal Kantores, Robert P. Jankov, and A. Keith Tanswell

AIRWAY BIOLOGY
Nicotinamide enhances apoptosis of G(M)-CSF-treated neutrophils and attenuates endotoxin-induced airway inflammation in mice
Claudia A. Fernandes, Laurence Fievez, Bernard Ucakar, Audrey M. Neyrinck, Catherine Fillee, François Huaux, Nathalie M. Delzenne, Fabrice Bureau, and Rita Vanbever

Properties of substance P-stimulated mucus secretion from porcine tracheal submucosal glands
Monal Khansaheb, Jae Young Choi, Nam Soo Joo, Yu-Mi Yang, Mauri Krouse, and Jeffrey J. Wine

LUNG FIBROSIS
New concepts of IL-10-induced lung fibrosis: fibrocyte recruitment and M2 activation in a CCL2/CCR2 axis
Lei Sun, Marisa C. Louie, Kevin M. Vannella, Carol A. Wilke, Ann Marie LeVine, Bethany B. Moore, and Thomas P. Shanley

AIRWAY SMOOTH MUSCLES
Paradoxical attenuation of β2-AR function in airway smooth muscle by Gi-mediated counterregulation in transgenic mice overexpressing type 5 adenylyl cyclase

Essential role of NF-κB and AP-1 transcription factors in TNFα-induced TSLP expression in human airway smooth muscle cells
Naresh Singh Redhu, Ali Saleh, Andrew J. Halayko, Aliyah S. Ali, and Abdelilah S. Gounni

EMPHYSEMA
Inhibition of histone deacetylase causes emphysema
Shiro Mizuno, Masanori Yasuo, Herman J. Bogaard, Donatas Kraskauskas, Ramesh Natarajan, and Norbert F. Voelkel

NEONATAL MEDICINE
Postnatal episodic ozone results in persistent attenuation of pulmonary and peripheral blood responses to LPS challenge
Kinjal Maniar-Hew, Edward M. Postlethwait, Michelle V. Fanucchi, Carol A. Ballinger, Michael J. Evans, Jack R. Harkema, Stephan A. Carey, Ruth J. McDonald, Alfred A. Bartolucci, and Lisa A. Miller

LUNG DEVELOPMENT
Airway administration of dexamethasone, 3′-5′-cyclic adenosine monophosphate, and isobutylmethylxanthine facilitates compensatory lung growth in adult mice
Yusuke Takahashi, Yotaro Izumi, Mitsutomo Kohno, Masafumi Kawamura, Eiji Ikeda, and Hiroaki Nomori
